ISC

*National English School, Kolkata*

**X-th (Science with Computer)**  
**in 2014 with 83.3%**

ICSE

*National English School, Kolkata*

## SUMMARY

I code because I love it. I learn because I am curious.  
I started learning how to code and fell in love with Front End Development. Now I just want to learn it all.  
I want to create things that make people ask, how did I do it?

## PROJECTS

My portfolio website.

- It is a React.js app with the implementation of all the basic concepts of React such as hooks, function-based components, React router DOM & more.
- It implements GSAP for the animation.
- It is a very beautiful website made only with the help of CSS.

Netflix clone

- Works on real-time APIs from TMDB.
- It has Firebase authentication implemented.
- Related videos & trailers are fetched from Youtube and are embedded when we click on movie cards

Super Mario Game

- Super Mario-like side-scroller game.
- Made with just CSS & Javascript.
- Decent graphics & parallax background implemented.

## SKILLS

HTML & CSS

javascript

Java

React.js

Firebase

DSA

Git

## EXPERIENCE

- Two-year experience at Ampacity India (Small scale core company) as General Manager.
- Got selected as Associate IT Analyst at ITC Infotech, during the on-campus selection process, but I was not able to join them due to some unavoidable reasons.
